

Science is our nature

ALL ABOUT YOUNG LIVING'S PATENTS

Young Living holds more essential oil production patents than any other direct sales company. These patents show the innovation behind our Seed to Seal® quality commitment, which differentiates us as the world leader in essential oils.

DID YOU KNOW?

- 17 patents are currently granted to Young Living
- 10 additional patent applications have been previously filed by Young Living demonstrating our commitment to science and discovery
- 14 of our patents list Founder D. Gary Young as an inventor
- 4 of our patents list Co-Founder and CEO Mary Young as an inventor
- Even third parties cite Young Living or our products at least 14 times when filing their own patent applications

WHAT PATENTS DOES YOUNG LIVING HOLD?

We own 11 utility patents* and 6 design patents* for new processes, products, and designs we've invented. These patents represent our commitment to leading the way in essential oil research and innovation.

- **Two patents for Blue Spruce essential oil**
(U.S. Patent No. 9,066,904 B2 and 9,675,653 B2)
- **One patent for a dietary supplement**
(U.S. Patent No. 9,211,277 B2)
- **One patent for a distillation system**
(U.S. Patent No. 10,000,723 B2)
- **Multiple patents for our liquid diffusers**
- **Multiple patents for massaging roller-ball application**

In addition to the patents above, we're constantly innovating to find new ways to bring the goodness of earth into homes around the world. Today, our Research and Development team is hard at work developing proprietary methods and compositions that will undoubtedly result in future patents.

*Utility patents are issued to those who invent or discover a new process, composition, method, or machine, whereas design patents protect a distinctive decoration or design
